

# Architectural Evolution of Houses in Sri Lanka

From ancient times Sri Lanka is very rich in the diverse and various forms of architecture of. The Sri Lankan architecture depicts the Concepts of Buddhism through its designs. Buddhism came into Sri Lanka around 3<sup>rd</sup> Century. The Stupas of Jetavanaramaya and Ruvanvelisaraya in the Anuradhapura kingdom are famous for their Buddhist roots. Sri Lanka has more than 25 Buddhist monasteries.

These Stupas were made up of largest bricks in pre-modern world. These bricks were held together using natural clay. After that as a protective covering Mixture of Lime Plaster was used. The Indian and East Asian architecture have had a great impact on Sri Lankan architecture, along with Southeast Asia.

From the beginning the focus was on designing environment friendly structure, which is still being followed.

## **Post-Independence Architectural Evolution:**

The architects of modern era started emerging out. They started building structures which had an image of past and novelty of modern things. Many Architects emerged out. Geoffrey Bawa was very famous for his modern designs in the era. The thought was to keep the structure open and spacious. Because of the warm climate of Sri Lanka, the architects were trying to keep the windows large and the walls as minimal as possible.
